

AT4ALL: Assistive Technology for All
ON THE ROAD TO SUCCESS

CONFERENCE PROGRAM

AUGUST 27-29, 2009

A Message from the Director of the Provincial Schools Branch

Beth Davies
Director, Provincial Schools Branch

It is my pleasure to welcome you to the first ever AT4ALL conference, a joint undertaking of the Provincial Schools Branch and the Association for Special Education Technology.

Our staff is dedicated to ensuring that students become equipped with the knowledge and competence necessary to be active and contributing citizens in our communities. The Provincial Schools Branch is the largest branch within the Ministry of Education and provides specialized elementary and secondary educational programs to identified students.

The Provincial Schools have long recognized the importance of assistive technology in providing students with special needs access to learning resources and is proud to have been on the forefront of many initiatives to further understanding of assistive technology and its effective implementation.

Enjoy the conference! We hope you get re-acquainted with past and current colleagues, meet some new ones, and leave with new-found confidence in your ability to support learners in their use of assistive technology.

Beth Davies

Table of Contents

Welcome (to conference and from PSB & ASET)	3
Organizing Committee	5
Get Connected! (Twitter, wireless info)	5
Conference at a Glance	6
List of Keynotes, Sessions and Presenters	7
Exhibitors List & Passport for Prizes	19
Participants Area (networking, notes)	20

Welcome from the Chair of AT4ALL

Dr. Nancy Sanders
Superintendent, Provincial Schools Branch

On behalf of the Provincial Schools Branch (PSB), Ontario Ministry of Education, it is with great pride and enthusiasm that we welcome all participants to the **AT4ALL** Conference. PSB is pleased to be hosting this event as it is an opportunity for others to visit our facilities and to learn more about the services we provide. In meeting the needs of students who are Deaf, blind, deafblind, or who have severe learning disabilities, we have learned that assistive technology (AT) plays an important role in the success for many of our students. We have seen the positive impact of assistive technology on the lives of our learners, therefore AT remains a priority in our research and teaching practice.

As we strive to increase achievement levels for all students, assistive technology provides promise and possibility. Assistive technology holds the potential of allowing more students to access the curriculum, and more educators to plan appropriately for the inclusion of all students. We invite you to learn with us through our international keynote speakers, outstanding session presenters, vendor visits and through opportunities to network with others.

I would personally like to take this opportunity to thank the Association for Special Education Technology and the entire planning committee members who have worked tirelessly over the past year to ensure that a vision became a reality. My heartfelt appreciation to you all!

May your experience at **AT4ALL** expand your understanding of assistive technology, challenge your thinking and inspire your vision of success for all.

Enjoy!

Welcome from ASET - the Association for Special Education Technology

Jeryl Phillips
President, ASET Ontario

We are proud to host our first official ASET conference in partnership with the Provincial Schools Branch of the Ministry! On behalf of ASET, I welcome you to the AT4ALL conference in Milton.

The Association for Special Education Technology is a growing network of Assistive Technology (AT) consultants, educators, technicians and support staff from educational institutions across Ontario who are dedicated to the support of students with special needs through the use of technology.

ASET grew from a small group of educators in the fall of 2004, who were dedicated to establishing a network of like-minded people across the province. Since then we have grown into a vital organization recognized as a provincial voice for promoting the use of AT for all learners. Through our members and Board of Directors, ASET has influenced the field of AT in many ways, including EQAO and the Ministry, as well as in more than 80 school boards, post-secondary, community organizations and educational service institutions.

With this valuable partnership with the Provincial Schools Branch of the Ministry and this conference, we look forward to growing even more.... We would like to thank those in the ASET Executive who were part of the hard-working organizing committee for AT4ALL, as well as the ongoing support from our talented Executive and members.

Our mission is "advancing the future of assistive technology in Ontario schools". While this is still true, the role of assistive technology has grown in the past few years to blur the dividing line between instructional and assistive technology. This growth can only serve to further enhance the opportunities for the special learners in our society to flourish. We feel honoured to play an active role in this. As a special opportunity, all educators who have registered in the AT4ALL conference will now be ASET members and be on our active mailing list and can attend our Spring meeting. Look for the flyer in your registration folder.

Over the next few days, enjoy, listen, watch, learn, think, play, network, then go out and make a difference!

AT4ALL Organizing Committee

Nancy Sanders: Conference Chair	Provincial Schools Branch Superintendent
Jeryl Phillips: Conference Co-Chair	ASET President/Peel District School Board
John Lubert: Conference Co-Chair	Provincial Schools Branch Technology Manager/ASET Past President
Peter Atkinson	ASET/Dufferin-Peel Catholic District School Board
Pat Balis	Provincial Schools Branch/ASET
Paul Cowley	Provincial Schools Branch
Liz Dunton	Provincial Schools Branch
Ron Foster	Provincial Schools Branch
Kevin Girard	Provincial Schools Branch
Leslie Jukes	Provincial Schools Branch
Lianne Lefebvre	ASET/Conseil Scolaire de District Catholique Centre Sud
Kathy Lewis	Provincial Schools Branch
Martha Martino	Provincial Schools Branch
Kelly Michalicka	Provincial Schools Branch
Frank Napoli	ASET/Niagara Catholic District School Board
Lillian Patry	Provincial Schools Branch
Terry Poirier	ASET/Erin Oak Kids
Jeanne Robinson	Provincial Schools Branch
Kim Slomka	ASET/Halton Catholic District School Board
Bob Spall	Ministry of Education Officer
Kari Veno	Provincial Schools Branch
Cheryl Zinszer	Provincial Schools Branch Superintendent

... and thank you to all of the Provincial Schools staff and volunteers in Milton who have worked so hard in preparing the facilities and program for you and for this conference.

Follow AT4ALL and post your tweets on

Join the Web 2.0 bunch and make your comments heard throughout the conference and after!

Go to www.twitter.com and Sign In to add your voice

Username: AT4ALL **Password:** at4all2009 www.twitter.com/AT4ALL to view comments.

Conference wireless!

Connect to AT4ALL Conference server anywhere on the grounds. No password is required.

Conference at a Glance

Thursday, August 27th, 2009

8:00	Registration, Refreshments Exhibitor Displays	Foyer Cafeteria
9:00	Welcome Greetings from Grant Clarke - ADM, Ministry of Education Introduction of Guest Speaker Keynote: Dr. Dave Edyburn	Auditorium
10:15-10:45	Morning Break (Two locations)	Foyer & Cafeteria
10:45	Continuation of Keynote	Auditorium
12:00	Lunch	Cafeteria
1:15-2:15	Workshop Session A	Secondary School
2:30-3:30	Workshop Session B	Secondary School
3:30-5:30	Meet 'n' Mingle Social	Cafeteria
3:30-4:00	ASET Annual General Meeting (near cafeteria)	Conference Room C

Friday, August 28th, 2009

8:00	Registration, Refreshments Exhibitor Displays	Foyer Cafeteria
9:00	Welcome Greetings from Beth Davies - Director, Provincial Schools Branch Introduction of Guest Speaker Keynote: Will Richardson	Auditorium
10:15-10:45	Morning Break (Two locations)	Foyer & Cafeteria
10:45	Continuation of Keynote	Auditorium
12:00	Lunch	Cafeteria
1:15-2:15	Workshop Session C	Secondary School
2:30	Final Wrap-up & Draw Prizes!	Auditorium

Saturday, August 29th, 2009

8:00	Registration, Refreshments, Exhibitor Displays	Foyer
9:00	Welcome Greetings from Nancy Sanders Superintendent, Provincial Schools Branch Introduction of Guest Speaker Keynote: Todd Cunningham	Auditorium
10:00-10:15	Morning Break	Foyer
10:15-11:00	Workshop Session D	Secondary School
11:15-12:00	Workshop Session E	Secondary School

Presentations and Workshops

Thursday, August 27th, 2009

Welcome: GRANT CLARKE, Assistant Deputy Minister, Ministry of Education

THURSDAY MORNING KEYNOTE ADDRESS

DR. DAVE EDYBURN, Associate Professor, Department of Exceptional Education, University of Wisconsin-Milwaukee.

Dr. Edyburn is an Associate Professor in the Department of Exceptional Education at the University of Wisconsin-Milwaukee. Dr. Edyburn's teaching and research interests focus on the use of technology to enhance teaching, learning, and performance. He has authored more than 100 articles and book chapters on assistive and instructional technology. Along with Drs. Higgins and Boone, Dr.

Edyburn is a co-editor of the recently published book, *Handbook of Special Education Technology Research and Practice*. He is a past president of the Special Education Technology Special Interest Group (SETSIG) in the International Society for Technology in Education (ISTE) as well as a past president of the Technology and Media (TAM) Division of the Council for Exceptional Children (CEC).

10:15 a.m. - 10:45 a.m. MORNING BREAK then continuation of Keynote address

During the break, take time to enjoy our Exhibitors and Publishers Display. Be sure to fill out your "Passport" each day to be eligible for free draws!

Workshop Descriptions

Thursday August 27th Session A Workshops: 1:15 p.m. - 2:15 p.m.

A1 Planning Strategies for Busy Teachers: Using Technology to Differentiate the Challenge Level of Learning Activities (Dr. Dave Edyburn)

As teachers plan for diverse students they often discover inadequate resources, strategies, and tools to support differentiation. The purpose of this session is to introduce technology tools and strategies that can be used in the classroom to engage students in learning at a level that offers optimal challenge.

A2 Clicker 5 – Creating an Inclusive Environment through Differential Instructional/Learning (Ray Mirshahi)

Clicker 5 is a powerful, versatile and user-friendly talking word processor with advanced graphic support and an amazing multimedia authoring tool. Both the English and French versions are licensed by OSAPAC for all public schools in Ontario. It can be integrated into any area of curriculum and used to facilitate student learning. Students in ESL, Special Ed., gifted and regular programs can all use Clicker 5 and therein lies the power of this amazing software – its inclusiveness.

Presentations and Workshops

A3 Bang, Pow, Kaboom: Comic Life (Lori Edwards, Barbara Williams, David Dowhaniuk)

Comic Life can be used to engage learners by creating their own graphic novel, visual social stories, and much more. Discover ways to differentiate written tasks, anchor charts, social stories, and procedural writing. Using a story book/graphic novel format this session will demonstrate specific accommodations to meet the needs of reluctant writers, as well as, students with Learning Disabilities and/or ASD. Comic Life is a Ministry Licensed software for both Mac and Windows platforms.

A4 What's Up – Resource Services Library has created an on-line catalogue & repository (Bob Minnery)

The Resource Services Library, under the direction of Ontario's Provincial Schools Branch, has created an online catalogue and repository that enables advisors to download alternate format text directly to their computers. The presentation will demonstrate how easy the system is to use and outline the project's history, rationale and future directions.

A5 Then What? Moving Beyond Training in the Implementation of AT (Kendra Grant)

Have you been "trained" on AT only to find you don't know where to start once you are back in the classroom? You're not alone! When the focus is on "training" rather than learning; the use of technology to support student learning flounders. What to do? Start by asking the question... "Then What?" "Then What?" suggests there is a next step (or many next steps). It says: "Technology" isn't enough. "Training" isn't enough. After we've been introduced to the technology, completed the training (or our students have been "trained"), received the manual... then what? This presentation will give you some suggestions to help you answer that very question.

A6 AT Across the Curriculum (Don Reist)

This workshop, intended for educators, will demonstrate and explain how AT can be applied effectively across the curriculum for all students. The focus will be on: reading/comprehension, writing/organization of thoughts, study skills, summarizing material & writing summaries, proofreading, spelling, increasing students' vocabularies, projects and presentations, structure of reports and supports for French. Applications examined: Kurzweil 3000, WordQ, Smart Ideas/Inspiration and Powerpoint.

A7 SMART Inclusion – Engineering the Classroom to Promote Success for All Students (Alison Inglis & Alexandra Dunn)

UCDSB is piloting SMART Technology in conjunction with what is generally thought of as "special needs" software/hardware, as a catalyst for inclusive classroom practices – "necessary for some -good for all". Technology is situated within the context of Universal Design, Differentiated Instruction and Participation Model. Combining technology with good instruction enhances educational and social participation for all students including those with disabilities. This pilot is data-driven – student participation and achievement are being tracked.

Presentations and Workshops

A8 Exploratory Investigations on the impact of assistive technology: Its potential impact on the self-concept, self-efficacy and academic achievement of students with learning disabilities.

(Gabrielle Young, John Barry & Jacqueline Specht)

AT can benefit all students, including those with learning disabilities. This presentation will review the literature on AT. We will share what students' say about AT as well as quantitative data demonstrating its impact. We will also discuss the potential link between AT and improvements in academic self-concept and how long this takes to occur. Recent data collected at a demonstration school will be presented as well as plans for future research endeavours.

A9 Bridging the Gap for all Learners: Best practice for using adaptive technology in high school **(Leanne Husk & Paula Stilwell-Gallant)**

This presentation will provide a comprehensive demonstration of Dragon NaturallySpeaking, Kurzweil 3000 and Smart Ideas. We will examine both the individual and combined uses of these programs as they relate to the secondary user and the extensive curriculums they face. Focus discussions and demonstrations will include promotion of the technology, fostering student acceptance and usage, managing tests and assignments, and OSSLT preparation and implementation.

A10 The Changing Face of Literacy - Helping students find tools that work!

(Brenda Sherry, Peter Skillen)

This session shows parents and educators the new kinds of literacies with which our students need to develop fluency in order to develop 21st century skills. Web 2.0 tools like Google for Educators, blogs, wikis, rss, social networking, global projects, diigo and other online tools for literacy will enhance the education of our students with special needs, while allowing them to access collaborative tools that will be so important as they continue their education and move on to the workforce. This session will provide a practical look at some of the best ways teachers can motivate students and enhance their use of technology to improve their literacy.

Thursday August 27th Session B Workshops: 2:30p.m. - 3:30 p.m.

B1 Accessing, Understanding, and Using the Special Education Technology Research Knowledge Base (Dr. Dave Edyburn)

Questions about the research-base for special education technology practices are increasingly asked. Participants in this session will receive resource materials on how to access the latest research on special education technology. Particular emphasis will be placed on discussing participants' questions about the value and use of assistive and instructional technology by students with disabilities and how the existing and emerging research knowledge base can be used to answer these important questions.

Presentations and Workshops

B2 How to use Dragon Naturally Speaking 10 to support all learners (Mario Addesa)

This presentation will introduce participants to an innovative way of using Dragon Naturally Speaking 10. The use of this program is a perfect example of the 21st century classroom. The ability to differentiate instruction with this program will prove to be beneficial for all students and learners. This tool will transform a teacher's oral notes into an electronic format. In this format, students are able to use a variety of assistive tools to support their individual learning styles.

B3 La techno au CSPGNO! (Benoit Douillette)

Je présenterais le modèle de prestation du CSPGNO en ce qui porte à la technologie d'aide. Il sera question de : Notre modèle de service avec les partenariats dans la communauté, L'appui offert aux élèves, les formations offerte aux personnels, l'appui aux évaluations (OQRE, tâches diagnostique, tâches sommative...), des statistiques des élèves TA, l'intégration de la technologie d'aide avec les TBI (tableau blanc interactif) et des trucs pratique !!

B4 Power Point Books: Reaching the hard to reach reader & writer (Connie Gray)

This workshop will illustrate a wide sampling of the Power Point Books available online, demonstrate how to create a book with text, illustrations and narration, and provide a rationale for the profiling of students with special needs who would significantly benefit. PowerPoint Books reach all students ranging from the reluctant preschooler to the Intermediate student with beginning literacy levels.

B5 Game ON – Engaging Reluctant Learners Through Interactive Lessons (Terry Poirier & Marianne Salvo)

This Assistive Technology presentation is about really seeing how students learn and providing ways of using out-of-school literacies to move the more reluctant high school students to be more successful and engaged readers and writers. The basis for this presentation is founded on research in the areas of multimodal instruction and gaming literacy.

B6 Implementation of Assistive Technology (Karen Morrison)

Many researchers conclude that assistive computer technology (ACT) has the potential for improving educational outcomes and improving the quality of life for those with disabilities. While it is recognized that ACT can have a positive impact on learning for students with learning problems, the process for the integration of assistive technology into the curriculum is more complex. A well documented gap exists between the potential of ACT and the realities of the classroom. Educators need easy access to professionals with expertise in technology and pedagogy. Technology strategic planning is essential. This presentation reviews the factors associated with effective implementation, barriers and suggests a model to address the ACT implementation process.

Presentations and Workshops

B7 Making an Accessible “Wiki School” one page at a time! (Ray Mirshahi)

A wiki is a web 2.0 tool with many applications in education. Wiki pages enable visitors or members to contribute or modify content, facilitating the creation of a powerful, highly collaborative online community. Wikis can become a repository of resources for everyone, including those with special needs. Multimedia based, interactive resources (lessons, games, tests and video tutorials) can be posted on a wiki to support all learners and educators in any area of the curriculum.

B8 Interactive Whiteboards: Supporting the Participation of all students in classrooms (Susie Blackstien-Adler & Janet Ragen)

Students in Ontario receive assistive technology designed to support their participation in academic activities, but these tools are often underutilized. Interactive whiteboards hold the promise to change this reality, allowing students with diverse learning challenges to participate more fully in small group and large group instruction. This presentation will discuss how the introduction of interactive white boards with a variety of applications can support universal design for learning principles and best practices in teaching, ultimately increasing the active engagement of all students, including those who use AAC or require alternate access.

B9 Ready, Set, Action. Using Video strategies to support learning & Transition (Joy Pekar)

Videos are powerful teaching tools that can support learning and ease transitions for all students, especially those with Autism Spectrum Disorders and other exceptionalities. Learn how to easily and effectively prepare videos. Build an understanding of how videos may benefit students from the day they prepare to enter kindergarten to the day they prepare to leave school to post secondary education, work or community placements.

B10 Essential Skills for Contemporary Students – Technology & More! (Pekka Baier-Reinio)

Students love to use technology! Discover how you can incorporate essential, readily available technological tools to support your students through Digital Storytelling, Communicating, Collaborating, Computing and the use of Assistive Technology. Using lessons learned from Sci-Fi classics, we will explore the essential skills and tools for the 21st century student and the role of technology in schools today.

B11 Exhibitor Displays and Discussion Tables (supporting Exhibitors)

Explore the various displays and interactive opportunities with those who help to make AT available to us!

Presentations and Workshops

ASET Annual General Meeting and Elections: 3:30 p.m. - 4:00 p.m.

Location: Conference Room C, near the cafeteria

Open to all educator AT4ALL participants and current ASET members.

Thursday Afternoon Meet 'n' Mingle! - 3:30 p.m. to 5:30 p.m.

This is an opportunity to Meet and Mingle with Munchies! Harpist Sara Hill will be providing entertainment during this session, held in the **cafeteria**. Hope to see everyone there.

Friday, August 28th, 2009

Welcome: BETH DAVIES, Director of Provincial Schools Branch

FRIDAY MORNING KEYNOTE ADDRESS

WILL RICHARDSON, Educator, Author.

Will Richardson is known internationally for his work with educators and students to understand and implement instructional technologies and, more specifically, the tools of the Read/Write Web into their schools, classrooms and communities. A public school educator for 22 years, Will's own Weblog (Weblogg-ed.com) is a primary resource for the creation and implementation of Weblog technologies on the K-12 level and is a leading voice for school reform in the context of the fundamental changes these new technologies are bringing to all aspects of life. His critically acclaimed, best-selling book *Blogs, Wikis, Podcasts and Other Powerful Tools for Classrooms* (March 2006, Corwin Press) is already being used by thousands of teachers to reinvent their practice, and his keynotes, presentations and workshops to audiences around the world communicate a fresh and inspiring vision of what schools can and must become.

10:15 a.m. - 10:45 a.m. MORNING BREAK then continuation of Keynote address

During the break, take time to enjoy our Exhibitors and Publishers Display. Be sure to fill out your "Passport" each day to be eligible for free draws!

Workshop Descriptions

Friday August 28th Session C Workshops: 1:15 p.m. - 2:15 p.m.

C1 RSS: Connecting Ideas and Knowledge (Will Richardson)

RSS is a powerful yet fairly untapped tool that educators can use to easily track many sources of information and knowledge. But it's also evolving into an effective way to connect people and ideas in ways that we've be unable to before. Using RSS, we can not only read what others write, we can read what they read, and even read what they create in easy, time-saving ways. This session will take a look at the tools and strategies that can make RSS an integral part of every educator's professional development and practice.

C2 Legislation, Standards & the Future of AT (Laurie McArthur, Charles Silverman)

What does the future hold? Can we expect fully accessible classrooms? Universal Design for Learning (UDL), accessibility legislation such as the AODA, and the continuing evolution of technology hold a world of promise. We will examine the impact of the pending legislation (AODA) and other international standards pertaining to accessibility on UDL practices and AT utilization in schools.

C3 DT Trainer & AT Trainer – Educational software for language learning for children with Autism or L.D. (Bonnie Plouffe)

DT Trainer is educational software for language learning for children with Autism or learning disabilities. The software was created based on methods developed to educate young children with Autism. DT Trainer's configurability also makes it beneficial for children with other learning disabilities, and even with typically developing young children. The Activity Trainer is a powerful software program that makes the research-based, effective Video Modeling teaching method practical for the classroom and home. The Activity Trainer is a versatile teaching tool that enables teachers to use videos to teach almost any targeted activity or skill – from simple to complex – and includes a library of activities with options to customize, modify and create new activities.

C4 Achieving Success Through Assistive Technology (Marianne Salvo, Kim Slomka & Susan Palijan)

The presentation will focus on how to support learners in selecting the appropriate tools for a successful high school experience. By embedding AT into the GLE10 curriculum and having a student led AT Conference, students are better prepared to be 21st century learners. Collaboration among teachers through the web, as well as an understanding of students' attitudes towards AT, informs professional practice on how AT can be effective tool to help all students succeed.

Presentations and Workshops

C5 Les blogs et les wikis pour accroître la motivation des jeunes (Yolanda Stevenson)

Motiver les jeunes en salle de classe semble un défi de plus en plus sérieux pour les enseignants. L'atelier aspire à démontrer qu'en utilisant en salle de classe, pour différents projets, les outils Web que les jeunes utilisent déjà entre eux, tels les blogs et les wikis, l'enseignant peut augmenter l'intérêt et la participation de tous les élèves de sa classe à de différents projets, tout en dirigeant son groupe vers une classe et, peut-être, vers une école sans papier. Cet atelier a aussi comme but d'introduire les enseignants à l'exploration et, éventuellement, à l'utilisation des ressources Web qui peuvent les aider à créer des espaces et des ressources significatives afin de promouvoir l'engagement actif du jeune et le développement des habiletés supérieures de la pensée.

C6 Universal Design for Learning (UDL) in practice (Diane LaFortune & Leanne Butcher)

Implementing UDL in the classroom presents opportunities and challenges for teaching and learning. Integrating the principles of UDL with differentiation and technology makes curriculum more accessible to all students. All students are provided with opportunities to access curriculum through different modalities. Changing the learning environment to meet the needs of all learners recognizes each child as a learner in the classroom.

C7 Getting the most out of Text-To-Speech Software (Todd Cunningham)

Text-to-speech (TTS) programs transform the text on a computer screen into speech which has been found to increase a student with a reading disability's reading speed and length of sustained reading. The workshop will present the findings of a recent study that investigated how comprehension is affected by the use of TTS programs and how to integrate these programs into differentiated instruction. The presentation/workshop is designed to increase users knowledge around text-to-speech software and how to implement it on a day-to-day basis. Audience members who work with students who have reading disabilities would benefit the most from participating in this workshop.

C8 A Web of Solutions: Maximizing Learning on the Web (Claire Zeijdel)

The internet has become a standard tool for research and students have access to web pages, search engines, databases, web quests, blogs, and even online textbooks! With the movement towards Universal Design for Learning, we need to be aware of how to make research on the internet more accessible to all students. This presentation will provide an overview of considerations for selecting websites including organization, reading level and graphic support. Tools and utilities that make websites more accessible and that facilitate organization of research material on-line will be demonstrated. Participants will also learn about "embedded" web-browsing in assistive technology products. Extensive resources will be available to participants through a presentation WIKI.

Presentations and Workshops

C9 Learn to Use WordQ to Support Written Communication (Kendra Grant)

In this session, participants will learn how to use WordQ in a hands-on lab setting. By the end of the session, participants will experience WordQ's in context word prediction, content reading support and auditory feedback for proofreading/editing within a variety of computer settings (Word, email, internet, Inspiration). In addition, they will have an opportunity to see how SpeakQ (voice recognition technology with "speech-enabled word prediction") works as an alternative to other voice recognition software.

C10 Podcasting to Support Differentiated Instruction (Zoe Branigan-Pipe)

Learn to combine two of the latest technologies to enhance student learning. Podcasting is a great way for educators to deliver content to their students. They can distribute homework assignments, record book narration for beginning readers to read along with, or create foreign language lessons that students can review at their own pace. When combined with a classroom amplification system, like the system created by FrontRow, teachers can engage all learners while creating a differentiated learning program. The FrontRow classroom amplification (soundfield) systems are research and school proven to aid classroom management, student test scores and listening.

C11 The Future of Reading – Paper or Digital? (Michael Kerr)

In the last decade music underwent a transformation – remember vinyl, 8-tracks, cassettes, CDs. Movies are currently making the same transformation. The future of books is about to change and some say 2009 will be the year of the digital book. In this workshop we will show some of the digital resources that are currently available and the devices that can access them. Copyright free etexts and audiobooks and digital resources for purchase will be explored. We will also demonstrate some of the ereaders currently available. Finally, the workshop will present ideas on how teachers, parents and students can use these resources. How do digital resources change teaching and learning? Each participant will receive a DVD with resources shared at the workshop.

Presentations and Workshops

Saturday, August 29th, 2009

Welcome: NANCY SANDERS, Superintendent Provincial Schools Branch

SATURDAY KEYNOTE ADDRESS

TODD CUNNINGHAM

Motivational speaker, Ph.D. student and researcher Todd Cunningham from the Ontario Institute of Studies in Education, University of Toronto and the Hospital for Sick Children will discuss strategies for students with learning disabilities and the potential of assistive technology. He has struggled with a learning disability and has learned to accommodate his dyslexia with the use of assistive technology. This engaging presentation will provide a personal life perspective on how assistive technology (text-to-speech, graphic organizers, word prediction, voice recognition) and learning strategies can help individuals with learning disabilities succeed.

10:15 a.m. - 10:45 a.m. MORNING BREAK

Workshop Descriptions

Saturday August 29th Session D Workshops: 10:15 a.m. - 11:00 a.m.

D1 Find your literacy tools when & where you find your literacy challenges

(Dr. Stephanie Timmer)

As the information highway picks up speed, the need to sort and read and digest that information is also accelerating. Premier Literacy tools have evolved to keep pace with the ever increasing pace of technology. Powerful and easy-to-use literacy tools can now be found in the same place you seek information – the Internet. The Premier Literacy Toolbar integrates directly into Microsoft Internet Explorer and Firefox making internet information more accessible. In this session attendees will receive free full working copies of all the technology and will be shown how all students can access information on the internet more efficiently and effectively.

D2 Tutoring and Assistive Technology (Don Reist)

This interactive workshop, intended for parents, will describe and explain the important role that Assistive Technology plays in effective tutoring of all students across the curriculum. In order to help parents understand the many benefits of implementing AT in tutoring, brief demonstrations of Kurzweil 3000, WordQ, Smart Ideas and Dragon NaturallySpeaking will be included. Upon the completion of the demonstrations, parents will be encouraged to actively play the role of students being tutored.

Presentations and Workshops

D3 Free AT Software – Band-Aid or Scaffold? Who cares as long as it works! (Laurie McArthur)

Free AT software is not new, is often overlooked while waiting for formal assessment and intervention. Browser and word processor add-ons offer powerful tools to assist with specific reading and writing challenges. Operating system enhancements may assist students with physical and sensor access issues. This workshop will provide a demonstration and discussion of key free software products that are useful scaffolds for all students, but key tools for success for some. Resources will be made available in print and on the SNOW website (<http://snow.utoronto.ca>).

Saturday August 29th Session E Workshops: 11:15 a.m. - 12:00 p.m.

E1 La Technologie D'aides les nouveautés (Terry Poirier)

Trouver des outils d'aide technologique en français a toujours été un défi. Toutefois l'on retrouve maintenant un nombre grandissant de ces outils. Cette présentation sera un aperçu général de différents outils technologiques disponible pour les enfants ayant des difficultés d'apprentissage. Le support en écriture, support en images, les feuilles de travail, la prédiction des mots, la lecture de textes électronique sur écran ainsi que sur l'Internet seront démontré. Cette présentation fera part d'options d'assistance technologique aussi bien pour des étudiants ayant des difficultés cognitives et ou physique ainsi que pour ceux ayant des difficultés d'apprentissage. L'application de ces instruments sera explorée a l'aide d'exemple que le présentateur a rencontré lors de ses diverses expériences avec les équipes francophone.

E2 Homework Struggles: Using Assistive Technology to Support Learning at home (Kendra Grant)

In this session, parents will learn simple but effective ways to use assistive technology with their child. Participants will discover the AT cycle - Inspiration, WordQ/SpeakQ, Kurzweil - and how the software works in conjunction to support reading and writing. Participants will view examples of Inspiration templates that support the organization of projects, research and writing assignments in ways that are engaging and creative. They will learn how WordQ/SpeakQ supports writing in any text-based program including Inspiration, Word and email. Finally, participants will discover how Kurzweil 3000 provides the ultimate level of reading support with its scan/read technology.

E3 Public School & Academic Libraries Assisting Learners on the Road to Success (Alison McCullough, Liz Kerr)

Public, school and academic libraries provide programs and services to support their communities of learners. Increasingly, libraries are implementing strategies and technologies to support equitable access to barrier-free services, information and communication. This session will outline what support is available now, what is being driven by Ontario Legislation, and what the vision includes for the future.

E4 The Ministry of Health's Assistive Devices Program funded Sight Substitution Centre at the W. Ross Macdonald (Robert Stam)

This presentation provides information about the Sight Substitution Centre at the W. Ross Macdonald School in Brantford which is funded by the Ministry of Health's Assistive Devices Program. The Sight Substitution Centre provides assessments for the Assistive Devices Program funding for high technology visual aids. This includes technologies for accessing print and electronic information and producing materials in alternate formats. The session will address the types of high technology visual aids provided through the Assistive Devices Program, which best meet the needs of children and adults who are blind, who have no functional vision for reading and writing, or whose primary means of reading and writing is auditory or Braille. The session will also discuss eligibility for funding and other services provided by the Sight Substitution Centre.

Thank you to our Exhibitors!

A special thank you to the many Exhibitors who have provided registration gifts and draw prizes. Your valuable support and generosity is most appreciated!

AT4ALL Exhibitor Passport

Make sure to visit the exhibitor displays in the cafeteria. Collect 6 or more stamps from the exhibitor booths during the conference, and enter to win valuable prizes! Raffle drawings take place on Friday at 2:30 in the Auditorium. You must be present to win.
